

Quarterly Investment Report

November 30, 2019 - February 29, 2020

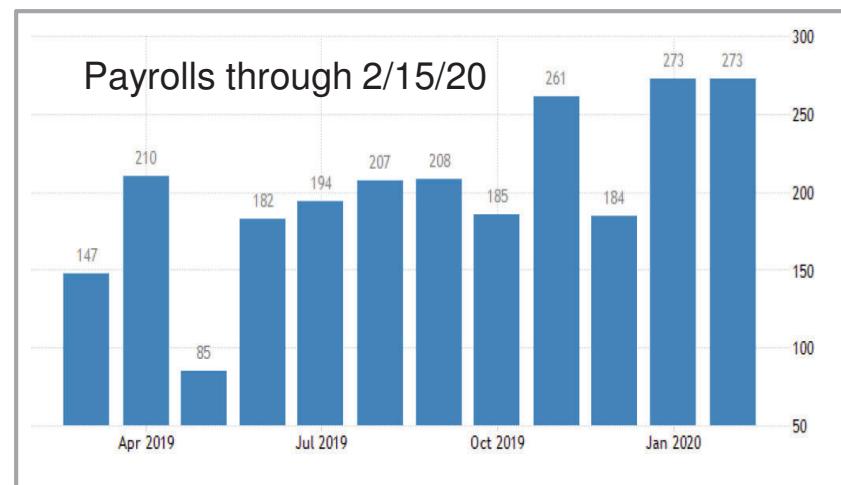

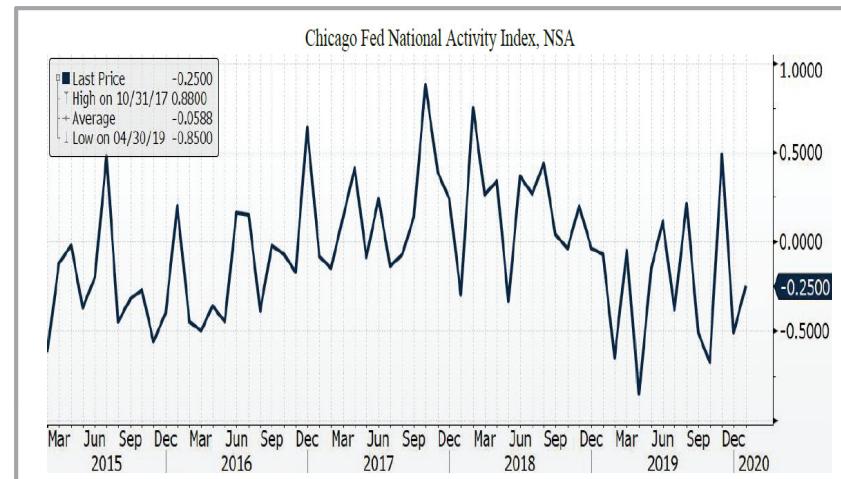

Virus Panic Overwhelms Markets

- Although the month of February started out solidly with the stock markets hitting all time highs and the economic picture still solid and stable, the last half of the month gripped the markets and put market participants in panic.
- U.S. economic growth remained mixed in early 2020, with moderate strength in consumer spending, a likely bottoming in business fixed investments and a robust housing sector.
- The corona virus (COVID-19), however, changed the entire investing landscape. The threat has had a major impact, reducing economic activity in China and disrupting global supply chains.
- The corona virus's jump to other countries has fanned investor fears. The risk of a U.S. contagion has hit share prices hard and fueled a flight to safety into bonds (lower yields).
- The historic highs of stocks crashed to historic daily lows and volatility. The fear was based on layoffs, decreased travel and constrained supply chains.
- G7 Finance Ministers met in face of the virus and issued a joint statement announcing a coordinated response. The statement noted that the leaders "are closely monitoring the spread of COVID-19 and its impact on markets and economic conditions." They also reaffirmed their "commitment to use all appropriate policy tools to achieve strong, sustainable growth and safeguard against downside risks."
- The Fed's response was to make an emergency $\frac{1}{2}$ % cut to the Fed Funds rates rather than to wait for their planned March 17-18 policy meeting. It was following Japan and Australia.
- Lower interest rates may not help much to offset the panic. The hit to China's economy will impact all its trading partners and until we get a clear indication of a peaking in cases, that panic looks to continue.

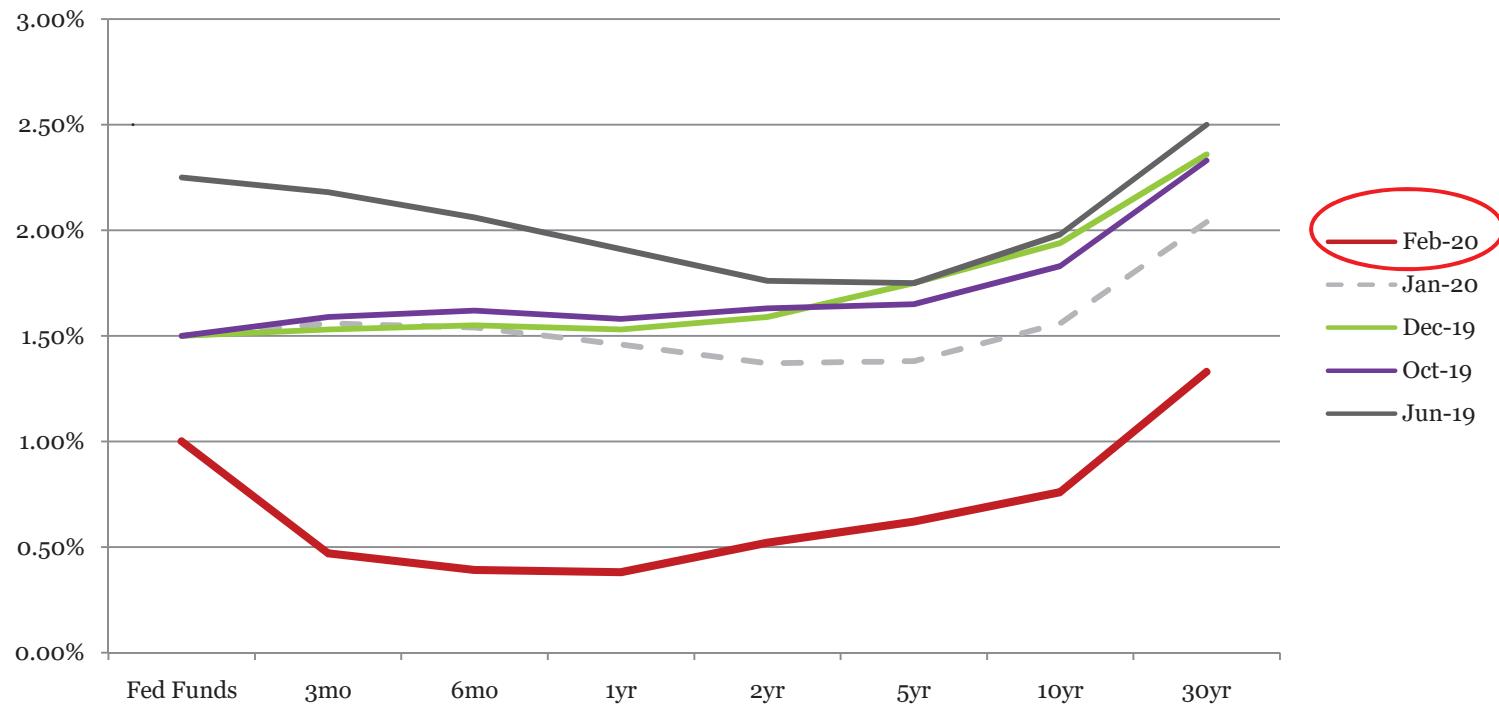

Fed Versus the Virus - Round One

- Going forward, despite the latest rounds of economic data still painting a relatively solid picture of domestic conditions – at least in hindsight – the FOMC is likely to continue a campaign of further policy adjustments with very few other arrows in their quiver. Additional cuts are being priced in by the market and may, if not eventually, reach an approaching zero.
- In times of uncertainty, markets typically look to central banks for a panacea. But since this is not economic in nature per se, but a potential to slow economies, do central banks even have the medicine they need. A series of rate cuts may prove ineffective if no business or consumer uses it. China remains in a virtual lock-down that lower rates will not cure.
- As the threat from the global outbreak continues to choke off international supply chains, restraining global travel and tourism, retail expenditures, as well as the free flow of labor, capital and goods, U.S. central bankers will act to cushion the domestic economy with the limited tools they have available. The question will be whether fiscal weapons will be brought to bear.
- The developing nature of the virus' threat – both real and perceived – is not yet quantifiable so the actions of the central banks can not be judged.
- Gold is up as investors run to grab safety nets, but when OPEC tried to cut production, the members again did not play well in the sand box so oil has dropped to three year lows. Most of the move will be into the US fixed income market continuing to drive yields on treasuries and agencies lower.

This is more than anyone expected

- To say this month's moves are dramatic is to state the obvious. The virus has caused rates to plummet. The corona virus has increased the demand for safe havens while questions about liquidity swirled in the debt markets. The virus has spurred an epic rally in global bonds as we re-visit historic low rates.
- Each day as the equity market gyrated wildly, the impact could be felt in the fixed income market. Risk off days brought broad swings to lower rates as investors rushed for safety. The curve dropped across all maturities. The question will be IF and WHEN the virus is tamed, will the supply chains and economic disruptions be too far depressed to be overcome in short order, because supply chains will start up immediately. That will probably depend on how long it lasts.
- On the short end the traders are amped up on bets that the Fed will cut again in March. Even the stronger than expected jobs report for February was enough to dent that call.

²Change in Market Value is required data, but will primarily reflect the receipt and expenditure of the College's funds from quarter to quarter.

Your Portfolio

As of February 29, 2020

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The graphs below show asset allocations by market sector and by maturity. They do reflect our ongoing anticipation of lower rates into 2020. These rate cuts and the potential of more decreasing rates indicates the need to extend portfolios. Extending now will lock in yields even though rates may decrease and provides for extra safety.
